## Professional Summary

Versatile Software Engineer with hands-on experience in backend (Java, Kotlin, Python), frontend (React, TypeScript), and cloud infrastructures (AWS and GCP). I have often shipped production-ready systems at scale, leading migration efforts, running experiments, and improving system performance. Demonstrated ability to own projects end-to-end and drive cross-functional collaboration.

Also highly curious and interested in self-learning and working on personal projects.

## Technical Skills

**Languages:** Java, Kotlin, Python, C/C++, TypeScript, JavaScript, SQL, Perl, Bash

**Frameworks & Tools:** Spring Boot, Node.js, React, GraphQL, Docker, Kafka, AWS, GCP

**Database/Cloud:** PostgreSQL, PL/SQL, Google Cloud, AWS

**DevOps:** Git, GitLab CI/CD, Jira, Harness, Slack workflows

**Testing:** Unit & Integration Testing (JUnit, Jest), Feature Flags, Canary Deployments

**Languages:** Spanish (Native), Catalan (Native), English (C2), French (B1), German (A1)

## Experience

**Software Engineer – Booking.com (Amsterdam)** - Jan 2025 – Present

- Designed and implemented scalable backend services for tax compliance pipelines using Java and AWS.
- Delivered Kafka pipeline optimization, resolving consumer lag and increasing throughput.
- Allowed for scaling of new countries joining the tax pipeline, which is a Booking company wide priority objective. For example, adding a new state for US that saved 8 million yearly in out-of-pocket expenses.
- Capacity to independently deploy critical services.
- Demonstrated strong critical thinking abilities in various discovery-
- Conducted A/B tests; proved improvement of user engagement and accessibility. Owned the implementation of features like “Available today” in the main Attractions page, working both in Frontend and Backend.phases of projects, where I identified requirements, risks, and implementation steps.

## **Education**

**Informatics Engineering – Polytechnic University of Catalunya**

Sep 2019 – Jan 2023

**Erasmus+: App Development – Saxion University of Applied Sciences**

Feb – Jul 2022

## **Certifications & Courses**

- AWS Developing on AWS (2024)
- AWS Architecting on AWS (2024)
- [Google Cloud digital leader](#)
- Harvard's CS50's Introduction to AI: [certificate](#)

## **Recognition & Leadership**

- Mentorship: Guided new graduates and led onboarding during Attractions Hackathon.
- Impeccable reviews from peers and performance scores.
